

GAS CONTROL TAP KIT

Kit provides taps to refurbish damaged or cross threaded gas connections. The three taps will rework standard thermocouple, main burner, and pilot outlets. Thread gauge determines proper tap selection.

RMI Part No.	Description
TPK-1	Complete Gas Control Tap Kit
Individual parts to kit	
TP-11/32DL	Thermocouple Tap- 11/32" x 32 NS
TP-3/8-18	Main Burner Tap- 3/8" x 18 NPT
TP-7/16-24	Pilot Tap- 7/16" x 24 NS
TP-TG	Thread Gauge- 18 Blade

GAS-KIT ORIFICE KITS

GK-201: Contains 10 each of standard cap orifices and 10 each of plug types to cover most conversion applications plus those "hard to get" taps and drills to refurbish thread connections.

GK-202: Contains 20 each of standard cap orifices and 20 each of 5 plug types.

RMI Part No.	Description
GK-201	Orifice Kit, w/ Taps & Drills
GK-202	Orifice Kit Only

To install a specific orifice, use drill and tap as shown in the chart below

GAS-KIT MI-100K ORIFICE ADAPTOR KIT

Kit will renew 80-90% of all orifices to use higher BTU gases.

Instructions: Remove existing orifice. Insert into anvil. Ream out orifice in conjunction with hand piece. Remove orifice from anvil, insert adaptor. Place orifice on end of anvil. Use driving tool & strike with hammer to set adaptor. Insert crimping tool into anvil. Strike with hammer & flare adaptor.
